Personal Learning checkpoint

Sample algebra checkpoint

Goal

Sample content only: understand algebra variables and expressions

Progress

Stage: lesson · Objective 2 of 3

1. Keeping both sides balanced

Understand equality.

2. Variables and expressions

Use symbols to represent values.

3. Solving one-step equations

Find and check a value.

Current lesson

This file belongs to a separate interface preview. All content is sample content. A variable represents a value; an expression combines values and operations.

Worked example

1. x + 3 = 8
2. Subtract 3 from both sides.
3. x = 5
